Building Software Systems

Lecture 2.4
Introduction to ReactJS

SAURABH SRIVASTAVA

ASSISTANT PROFESSOR

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

IIT (ISM) DHANBAD

What is ReactJS?

A declarative, efficient, and flexible JavaScript library for building user interfaces
- ◦ Developed by Facebook in 2013
- ◦ Suitable for developing single-page applications (SPAs) and mobile applications (via React Native)

Design views for each state in your application
- ◦ React will efficiently update and render just the right components when your data changes
- ◦ Helpful in building Applications following the MVC Architecture
